Informed Consent to Naturopathic Medical Care

I hereby request and consent to the performance of evaluation and management services as well as other procedures by my doctor at the Salem Naturopathic Clinic, PC. I understand that I have the right to ask questions and discuss to my satisfaction with Dr. _____ the nature and purpose of naturopathic medical evaluation and treatment and other procedures which my naturopathic physician may administer.

I understand and am informed that:

1. Naturopathic Medicine is the science, philosophy and art of identifying and treating diseases, dysfunctions, disorders and imbalances of normal human physiologic function. There has been no promise implied or otherwise, of a cure for any symptom, disease or condition as a result of treatment in this clinic.
2. As with any practice of medicine, it is not an exact science, but relies upon information related by the patient, information gathered during examination, and the doctor's interpretation thereof, as well as the doctor's judgment and expertise in working with like cases.
3. I understand that my physician may administer manual therapy using his/her hands. I understand that my physician may use manipulation of joints, tendons, muscles and connective tissue in the body to restore motion / mobility. He or she will use his hands or a mechanical device upon my body to adjust a joint which may cause an audible "pop" or "click."
4. It is not reasonable to expect my physician to be able to anticipate, or explain, all possible risks and complications of a given procedure on any particular visit and I wish to rely on the doctor to exercise professional judgment during the course of any procedures, which he feels at the time to be in my best interest.
5. An undesirable result, or side effect, does not necessarily indicate an error in judgment or an improper treatment. I agree to communicate any such information to my physician in a timely manner so that changes in my treatment plan, if any, can be made.
6. As with any healthcare procedure, there are certain complications which may arise during any given medical procedure. Those complications from manipulation include sprains/strains, dislocations, fractures, disc injuries, or cerebral-vascular accidents. Complications from injections may include pain at site of injection/infusion, allergy to injectant resulting in anaphylaxis, which maybe fatal; light-headedness and weakness after injection. These complications are extremely rare occurrences.

I have read the above consent, or had it read to me, have had the opportunity to ask questions and receive answers, am comfortable with the information provided and consent to naturopathic medical evaluation, treatment and management on that basis.
